

**W**hen we started the company over two decades ago, we had a clear vision; Huntwood would build fine cabinetry that reflected our deep and abiding respect for each customer's sense of individuality. To this day, we have used that vision to hone improvements in every aspect of the business... from an environmentally friendly product offering... to fabrication and material selection... through quality control and customer service. Every cabinet we make combines an artist's eye for beauty with a craftsman's eye for detail. Each piece is conceptually developed to help our customer's dream design become reality in its finest form.

One of the greatest rewards of being a family owned and operated business is the sense of extended family. We believe we've assembled the finest leadership team and they in turn have developed an amazing staff of associates. Know that every one of us stands behind the job we do for you.

We'd like to take this opportunity to thank you for considering Huntwood.

God bless you,  
 Tim Hunt, President  
 Resa Hunt, Vice President

## STRIKING CONTRASTS

Horizontal lines pronounce the openness of this modern traditional kitchen. The utilization of an aged black finish on the island and hood cabinet, as well as a black antique glaze treatment everywhere else, provide a bold explanation to an otherwise straight-forward design.

# Traditional

SEVILLE

## THE WORLD'S MOST ENVIRONMENTALLY FRIENDLY CABINET MANUFACTURER

From day one, our state-of-the-art plant was designed to have the lowest environmental impact of any woodworking facility in the world. Energy-saving features were engineered into heating, cooling and lighting systems. Huntwood's finishing process features a technology that reduces VOC emissions to ultra-low levels, resulting in several awards.

This advanced system also includes a reclamation function that recycles 66% of surplus materials into future applications, minimizing waste in the process. As a manufacturer and member of the global community, Huntwood is continually striving to set a higher standard for environmental responsibility.

## A HIGHER STANDARD OF GREEN

### GREEN SUSTAINABILITY

### GREEN PRODUCT

Huntwood let's you choose the exact green solution that's right for you: from our Genesis™ series of cabinet interiors, featuring non-urea-added formaldehyde substrates, to our extensive collection of laminates, alternative materials and quickly-replenishing natural wood species.

### GREEN CERTIFICATION

- KCMA's Environmental Stewardship Program
- SCAPCA Clean Air Award
- Sustainable Materials
- FSC Chain of Custody SCS-COC #001022
- Up to 7 LEED Credits

### GREENER LIVING SPACES

Our award-winning finishing system is not only safer for the environment, it dramatically reduces the amount of "out-gassing" normally associated with new cabinetry. Powerful drying ovens cure the finish top-coat much harder, sealing the substrate.
