

HUNTWOOD Luxury Wood Tops

The Natural Beauty of Wood

These countertops are hand-crafted with the utmost care, following a rigorous set of quality standards. The wood for every top is hand selected to maximize the beauty of the grain, color, and texture. Since wood is a natural product, variation from piece to piece should be expected giving you a one-of-a-kind luxury wood top.

Wood Species

Your choice of wood will have the most impact on the ultimate look of your luxury wood top. We offer 10 different species of wood: Maple, Oak, Alder, Beech, Cherry, Hickory, Black Walnut, Rift-cut White Oak, Rustic Alder and Rustic Hickory.

All surfaces are sealed with Waterlox® Tung-Oil, a hand-applied oil that serves to enhance the natural color of the wood. The oil-finished surface is waterproof, food-safe and resists stains from beverages, moisture and acids.
