Factory Glass Program

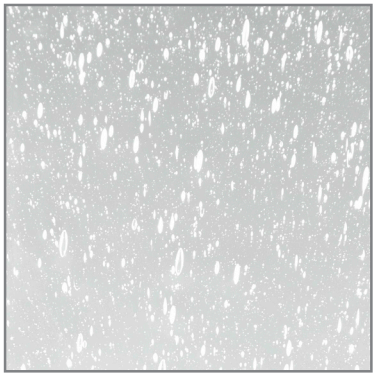

Customize your cabinets with one of our 5 glass selections:

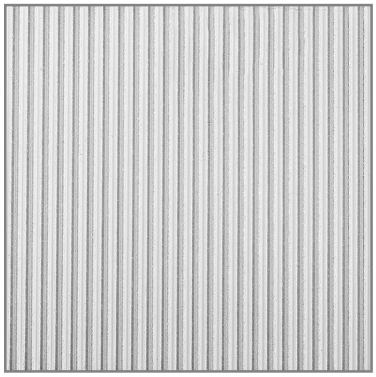

Clear
GL1CG

Mirror
GL8MI

Seedy
GL7SE

Quarter Reed
GL10RDV

Satin Etched
GL2SE

Glass may be ordered loose as priced in the Huntwood Catalog or "factory installed" via the MDIG modification. When ordering "loose," specify exact width and height dimensions of the glass panel (example: 14 ¼" wide x 16 ½" high). If you need help calculating glass panel size for a specific cabinet/door size, contact Customer Service for assistance. When ordering glass "factory installed," you will need to select a glass door modification (MDFG, MDFGU, MDGM, MDPM, MDQM, MDGMXP, MDGMG) and apply it to the respective cabinet (or loose door) to "prepare the door for glass;" you will then apply the MDIG modification to the cabinet (or loose door) to install the glass. Glass is ordered (and priced) separate of the cabinet (or loose door) and its respective glass door modification.

NOTE: Minimum glass charge is 2 square feet per piece of glass. Only the Clear selection is tempered and then only if the glass size involved is greater than 12"W x 12" L.
